DETAILED ACTION

EXAMINER'S AMENDMENT

EX. Amdt

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Talivaldis Cepuritis on 2/10/04.

The application has been amended as follows:

IN THE CLAIMS:

Have cancelled non-elected method claims 34-51. ✓

Election/Restrictions

Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claim 20, directed to a non-elected species is no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

Claims 1, 3, 5-22 are allowed.

The following is an examiner's statement of reasons for allowance: an apparatus for detecting and removing particles from the surface of a substrate, the apparatus including:

a particles localization unit adapted to scan the surface of the substrate to determine the locations of particles; an optical arm adapted to direct a beam of electromagnetic energy onto the particles located by the localization unit; and a moving substrate chuck configured move the substrate relative to the particle localization unit so as to cause the particle localization unit to scan the surface of the substrate in first and second regions of the surface, and to cause the beam to impinge upon the locations of the particles in the first region of the surface while the particle localization unit scans over the second region,

wherein particle localization and particle removal are carried out simultaneously while the substrate is supported on the same chuck within the same chamber.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Parviz Hassanzadeh whose telephone number is (571)272-1435. The examiner can normally be reached on Tuesday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory Mills can be reached on (571)272-1439. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
